

The Open Stable Sling/Universe

Free your funny bone while providing comfort, stability and rotation control of the shoulder.

Top Shelf Orthopedics introduces an innovative approach to shoulder stabilization with a patent pending open elbow design.

ACE Award Finalist at
the 2024 AOSSM Meeting

Top Shelf Orthopedics™ provides high-quality products for medical professionals and the patients they care for.

The Open Stable Sling/Universe

Wearing a sling after a shoulder surgery used to be an uncomfortable experience, which meant less compliance and discomfort. By leaving the elbow open, these issues are addressed with **The Open Stable Sling**. Allowing the arm to sit in a natural but supported position helps reduce the chances of irritation to the nerves and soft tissue around the elbow while the shoulder heals.

Indications:

- Rotator Cuff Repair
- Bankart Repair
- Shoulder Instability
- Total Shoulder Replacement
- Capsule Repair
- Muscle / Ligament Injury
- SLAP Repair
- Shoulder Dislocation
- Posterior Capsule Repair
- AC Joint Separation

Features and Benefits:

- Sized Sling-Fits right or left, Universe accommodates most sizes reducing inventory needs
- Standard Abduction Pillow, External Rotation Abduction Pillow Options
- Internal, neutral & external rotation adjustable to accommodate rehab specific guidelines
- Multiple thumb support options to decrease irritation
- Comfortable shoulder strap reduces pain and pressure on the unaffected shoulder
- Trimmable strap ends allow for adjustment and optimal fit to the wearer
- Easy one handed buckle closure allows the wearer to don and doff the device without assistance
- Allows “Sling Only” configuration to aid in the recovery process when abduction is no longer needed
